Conservatory for 2023–2029 and proposals for the National Ranking.	
Weaknesses	Threats
 Dependence on a limited group of staff: Most tasks and activities are carried out by a small team within the sector, which poses risks in the event of staff changes. Limited resources, which may affect the sustainability of development. Heavy regulatory burden: A high degree of bureaucratization and the need for constant compliance with numerous external requirements can hinder innovation. 	 1) 1 Changes in the regulatory and legal framework of the Republic of Kazakhstan may require significant revisions to documentation and procedures. 2) Insufficient digital transformation may lead to lagging behind in management technologies. 3) Human resource risks: High workload on key staff may lead to burnout or the loss of qualified personnel. 4) Financial constraints from the state budget may impact the implementation of new initiatives. 5) Conservatism within the academic environment: Possible resistance to change from staff who are not ready for process transformation.
